

OVERX (OVEX)

COMPLETE WHITEPAPER

The Universal Gaming Economy on BNB Chain

■	Multi-Game Utility	Universal token across all gaming platforms
■	BNB Chain	Fast transactions with minimal fees
■	Deflationary	Multiple burn mechanisms
■	8-15% Staking APY	Attractive passive rewards
■ ■	DAO Governance	Community-driven decisions

Version 1.0 | February 2026

1. EXECUTIVE SUMMARY

OverX (OVEX) is a next-generation gaming utility token built on BNB Chain, designed to power a multi-game ecosystem where players seamlessly deposit, withdraw, and transact across multiple gaming platforms. OVEX solves the critical fragmentation problem in gaming economies by providing a unified, high-performance currency that works across diverse gaming genres while ensuring fast, low-cost transactions and sustainable tokenomics.

Token Name	OverX
Ticker Symbol	OVEX
Blockchain	BNB Chain (BEP-20 Standard)
Total Supply	1,000,000,000 OVEX (Fixed Cap)
Initial Circulating	70,300,000 OVEX (7.03%)
Supply Model	Deflationary (Multiple Burn Mechanisms)

Key Features:

- **Universal Currency:** One token that works seamlessly across all integrated gaming platforms
- **Instant Transactions:** Deposits complete in under 5 seconds with fees below 1%
- **True Ownership:** Players maintain self-custody and complete control of their gaming assets
- **Deep Liquidity:** Listed on major DEXs for easy entry and exit
- **Deflationary Model:** Multiple burn mechanisms reduce circulating supply over time

2. VISION & PROBLEM STATEMENT

The Problem with Current Gaming Economies

Modern gaming economies face significant structural challenges that prevent seamless value transfer and create unnecessary friction for players:

- **Fragmentation:** Each game operates with its own isolated currency, creating liquidity silos and preventing cross-game value transfer
- **High Transaction Friction:** Slow deposit/withdrawal processes with excessive fees significantly reduce player earnings
- **Poor Exit Liquidity:** In-game currencies often lack sufficient liquidity, trapping player value
- **Centralized Control:** Players lack true ownership and control over their gaming assets
- **Cross-Platform Barriers:** Complete absence of value portability between different gaming platforms

The OverX Solution

OverX creates a unified gaming economy with advanced blockchain infrastructure:

- **Universal Currency:** Single token (OVEX) functioning across all integrated platforms
- **Instant Transactions:** Complete in under 5 seconds with fees below 1%
- **True Asset Ownership:** Complete self-custody and control
- **Deep Market Liquidity:** Major DEX listings enable fair market entry/exit
- **Full Transparency:** All transactions publicly auditable on-chain

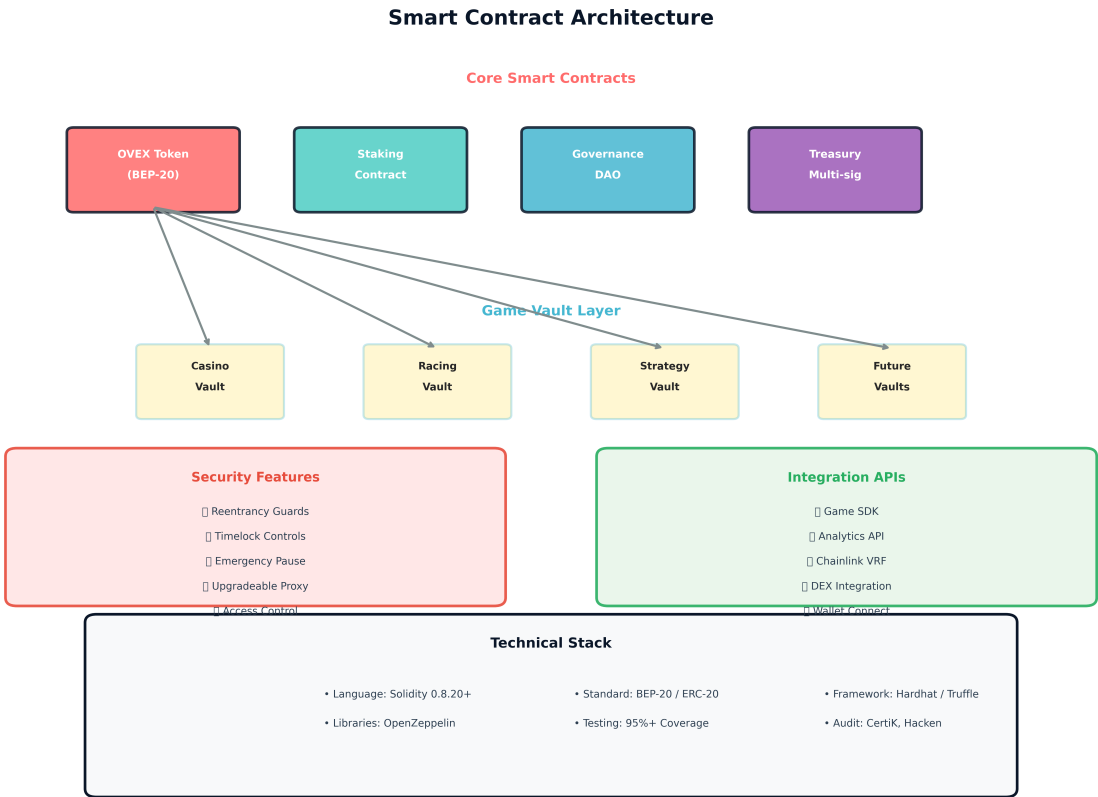

3. TECHNICAL ARCHITECTURE

BNB Chain Selection

OverX is built on BNB Chain, the optimal blockchain infrastructure for high-performance gaming:

- **Speed:** 3-second block times enable near-instant transaction confirmation
- **Cost Efficiency:** Average gas fees of \$0.01-0.05 make micro-transactions viable
- **Established Ecosystem:** Over 150 million users with mature wallet infrastructure
- **Gaming Focus:** Home to leading Web3 games with proven track record
- **Developer Tools:** Comprehensive development tools and robust wallet support

System Architecture Diagram:

4. TOKEN UTILITY & USE CASES

Gaming Deposits & Withdrawals

- **Instant Deposits:** Deposit to game vaults in under 5 seconds with zero fees
- **Fast Withdrawals:** Withdraw winnings within minutes (5-minute security delay)
- **Cross-Game Balance:** Optional unified balance across all games
- **Gas Optimization:** Batched transactions reduce costs by up to 60%

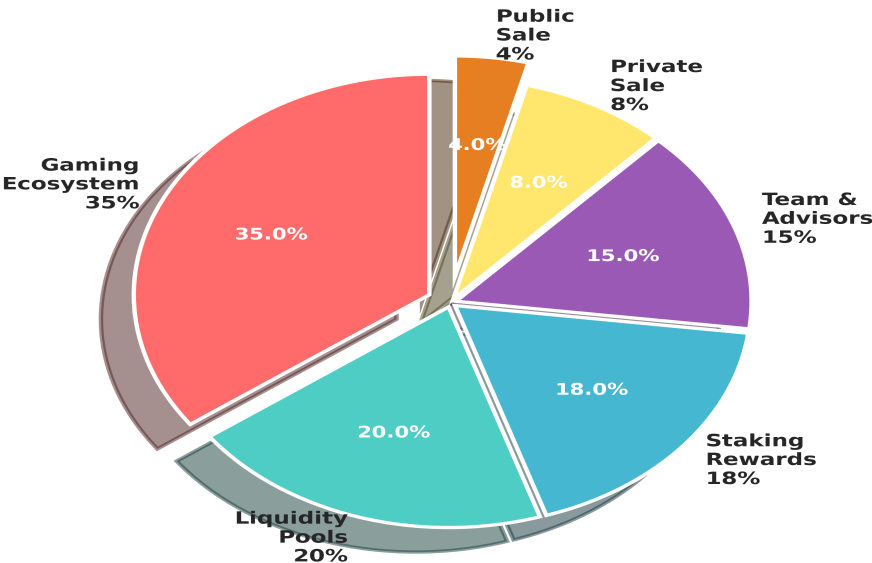

In-Game Currency Functions

- **Universal Exchange:** Use for betting, wagering, and purchases
- **Reward Distribution:** Earn from tournaments, bonuses, achievements
- **Staking Benefits:** Unlock VIP tiers and reduced fees
- **P2P Trading:** Direct player-to-player transactions

5. TOKENOMICS MODEL

Token Distribution Strategy

OVEX Token Distribution
Total: 1,000,000,000 OVEX

Allocation	Amount	%	Vesting
Gaming Ecosystem	350M	35%	48 months
Liquidity Pools	200M	20%	36 months
Staking Rewards	180M	18%	60 months
Team & Advisors	150M	15%	12mo cliff + 36mo
Private Sale	80M	8%	6mo cliff + 24mo
Public Sale	40M	4%	25% TGE + 6mo

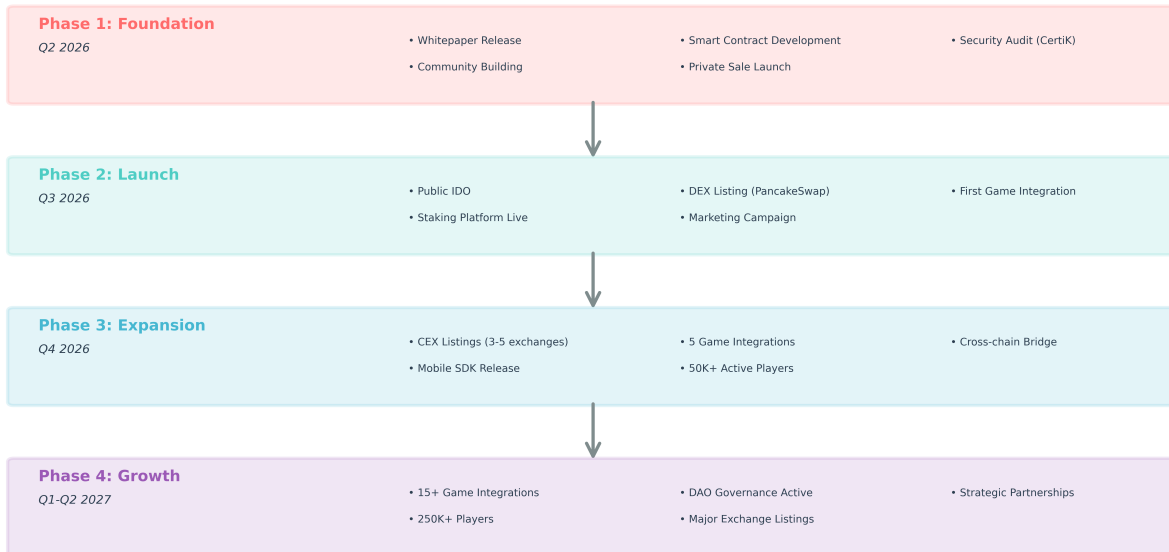

Deflationary Burn Mechanisms

- **Withdrawal Fees:** 0.3% of all withdrawals permanently burned
- **Tournament Fees:** 50% of entry fees removed from supply
- **Trading Fees:** 30% of 0.5% in-game trading fee burned
- **Quarterly Burns:** 10% of treasury profits (governance approved)

Projected Impact: Over 5 years, burns expected to remove 120-150M OVEX (12-15% of supply).

6. ROADMAP & MILESTONES

OverX Development Roadmap

Detailed Milestone Breakdown

Phase 1: Foundation (Q2 2026)

- Complete whitepaper publication and distribution
- Smart contract development and internal testing
- Security audit by Certik
- Community building across Discord, Telegram, Twitter
- Private sale launch to strategic investors

Phase 2: Launch (Q3 2026)

- Public IDO on PancakeSwap or Binance Launchpad
- DEX listing with initial liquidity provision
- First game integration goes live
- Staking platform activation

- Major marketing campaign launch

Phase 3: Expansion (Q4 2026)

- CEX listings on 3-5 exchanges
- Achieve 5 game integrations
- Launch cross-chain bridge to Ethereum/Polygon
- Release mobile SDK for developers
- Reach 50,000+ active players

Phase 4: Growth & Maturity (Q1-Q2 2027)

- Expand to 15+ game integrations
- Activate full DAO governance
- Secure strategic partnerships with major studios
- Grow to 250,000+ active players
- Target Tier 1 exchange listings (Binance, Coinbase)

7. TEAM STRUCTURE & GOVERNANCE

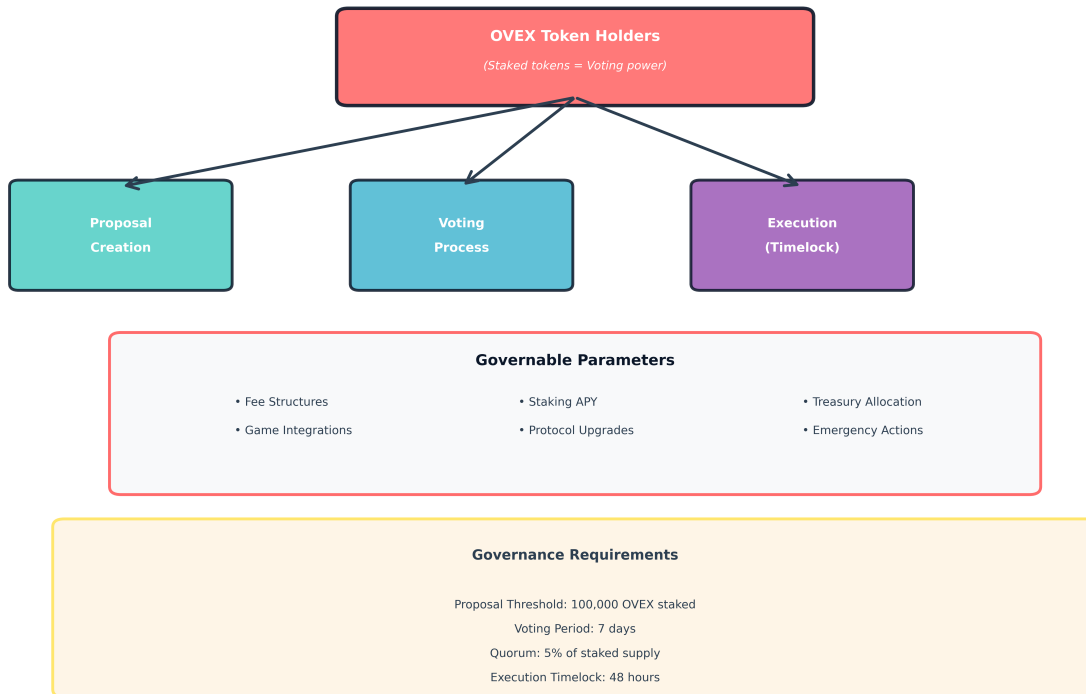

Core Team Expertise

- **CEO & Co-Founder:** 15+ years in gaming industry (EA, Ubisoft), proven track record in game launches
- **CTO & Co-Founder:** Former Binance blockchain engineer with deep DeFi expertise
- **Head of Game Development:** Led mobile games with 10M+ downloads
- **Head of Smart Contracts:** Audited over \$500M in DeFi protocols
- **CMO:** Growth lead at major GameFi project reaching 20M users

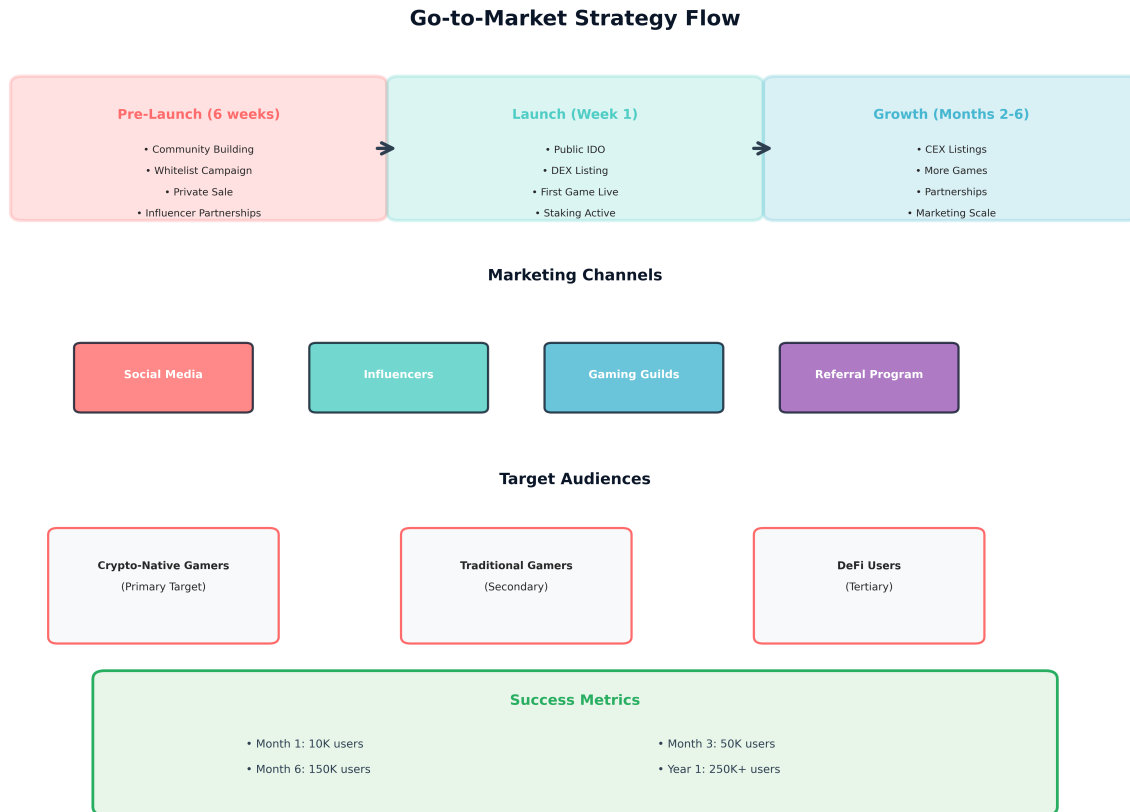

DAO Governance Framework

DAO Governance Structure

- **Voting Power:** 1 staked OVEX = 1 vote
- **Proposal Threshold:** Minimum 100,000 OVEX staked required
- **Voting Period:** 7 days for community participation
- **Quorum Requirement:** 5% of total staked supply
- **Execution Timelock:** 48-hour delay before implementation

8. GO-TO-MARKET STRATEGY

Launch Phases

Pre-Launch (6 weeks before TGE):

- Build community across Discord (target 10K), Telegram (5K), Twitter (15K)
- Run whitelist campaign with exclusive benefits
- Complete private sale to strategic investors and gaming guilds
- Partner with 50 crypto/gaming influencers for launch amplification
- Conduct AMA sessions and educational content series

Launch Week:

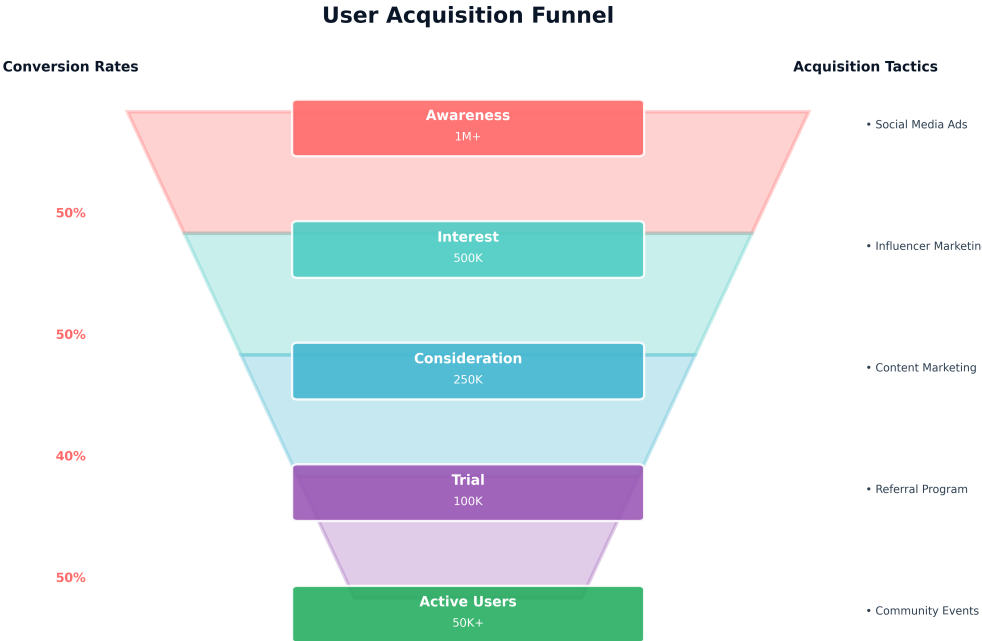

- Execute public IDO with strong marketing push
- List on PancakeSwap with deep initial liquidity

- Launch first game integration for immediate utility
- Activate staking platform with attractive APY
- Host launch tournament with prize pool
- Secure CoinGecko and CoinMarketCap tracking

Marketing Channels & Tactics

- **Social Media Advertising:** Targeted campaigns on Twitter, Facebook, Reddit gaming communities
- **Influencer Partnerships:** Collaborate with 5-10 mid-tier gaming/crypto influencers
- **Gaming Guild Partnerships:** Partner with major guilds like YGG and Merit Circle
- **Content Marketing:** SEO-optimized articles, tutorial videos, infographics
- **Referral Program:** Incentivize users to invite friends with token rewards
- **Community Events:** Weekly tournaments, challenges, and giveaways

9. USER ACQUISITION STRATEGY

Target Audience Segments

- **Primary: Crypto-Native Gamers (18-35, Male 70%):** Already use MetaMask/Trust Wallet, active in Discord/Telegram, play P2E games. CAC target: \$3-5
- **Secondary: Traditional Gamers Exploring Crypto:** Casual to mid-core gamers curious about blockchain gaming. Need education on wallet setup. CAC target: \$8-12
- **Tertiary: DeFi Users:** Hold other gaming tokens, active in staking/yield farming, less gaming-focused, more ROI-oriented. CAC target: \$10-15

Acquisition Funnel Stages

- **Awareness (1M+ reach):** Social media ads, influencer content, PR coverage, community raids
- **Interest (500K engaged):** Website visits, whitepaper downloads, Discord joins, Twitter follows
- **Consideration (250K):** Whitelist signups, AMA attendance, detailed research phase
- **Trial (100K):** IDO participation, first OVEX purchase, initial game deposit

- **Active Users (50K+):** Regular gameplay, staking participation, community engagement

Retention & Engagement

- Daily login bonuses and streak rewards
- Weekly tournaments with OVEX prizes
- Monthly staking reward distributions
- Tier-based loyalty program (Bronze to Platinum)
- Regular game content updates and new integrations
- Active community management and support

10. EXCHANGE LISTING STRATEGY

Exchange Listing Strategy & Process

Phased Listing Approach

Phase 1: DEX Listings (Launch Day):

- PancakeSwap (primary listing with deep liquidity)
- Biswap and ApeSwap for additional exposure
- Integration with 1inch and other DEX aggregators
- Initial liquidity: substantial allocation from token supply

Phase 2: Tier 3 CEX (Month 2-3):

- Gate.io - Large user base, gaming token friendly
- MEXC - Fast listing process, good liquidity
- Bitget - Growing exchange with competitive fees

Phase 3: Tier 2 CEX (Month 4-6):

- KuCoin - Strong gaming/NFT community
- Bybit - Derivatives trading opportunities
- OKX - Major Asian market access

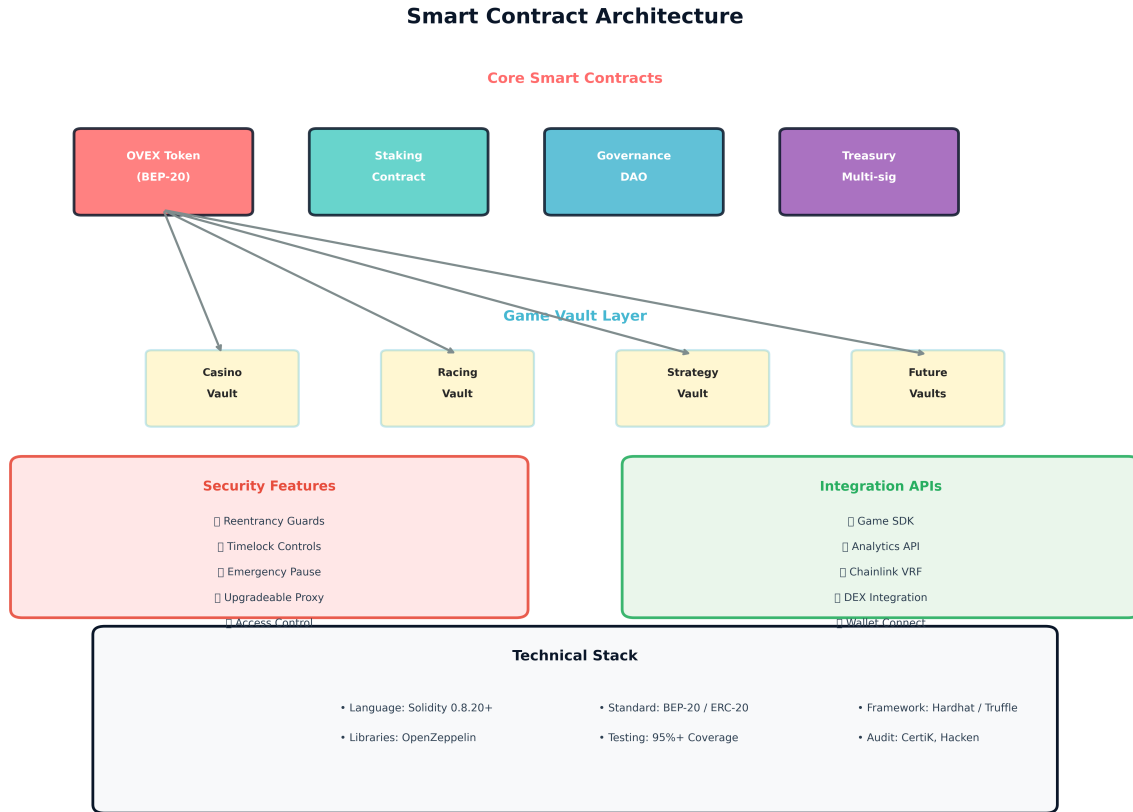

Phase 4: Tier 1 CEX (Month 12+):

- Binance - World's largest exchange, ideal for gaming tokens
- Coinbase - US market access and institutional credibility
- Kraken - European expansion and regulatory compliance

Listing Requirements Checklist

- ✓ Working product with active users and games live
- ✓ Completed security audit from reputable firm (CertiK)
- ✓ Minimum 10,000 token holders across multiple countries
- ✓ Active community of 50,000+ members
- ✓ Market maker partnership for liquidity provision
- ✓ Legal opinion letter on token classification
- ✓ Consistent trading volume demonstrating demand
- ✓ Strong, transparent team with KYC completion

11. SMART CONTRACT ARCHITECTURE

Core Smart Contracts

- **OVEX Token Contract (BEP-20):** Core token implementing BEP-20 standard with batch transfer capabilities, operator permissions, and emergency pause mechanism
- **Staking Contract:** Manages token staking across four tiers (Bronze to Platinum) with different lock periods and APY rates. Handles reward distribution and early withdrawal penalties
- **Governance DAO Contract:** Enables proposal creation, voting, and execution with timelock controls. Voting power based on staked OVEX amount
- **Treasury Multi-sig:** 3-of-5 multi-signature wallet managing protocol treasury, development funds, and operational expenses

Game Vault Layer

Separate escrow contracts for each game or game category providing isolated security:

- Casino Vault: Manages deposits/withdrawals for poker, slots, roulette games
- Racing Vault: Handles car and horse racing game balances
- Strategy Vault: Supports tower defense and RTS game transactions
- Future Vaults: Expandable architecture for new game integrations

Security Features

- **Reentrancy Guards:** Protect against recursive call attacks on all external functions
- **Timelock Controls:** 48-hour delay on critical parameter changes for community review
- **Emergency Pause:** Circuit breaker to halt operations if exploit detected
- **Upgradeable Proxy (UUPS):** Allows bug fixes and feature additions without migration
- **Access Control:** Role-based permissions (Owner, Operator, Pauser, Upgrader)
- **Flash Loan Protection:** 5-minute withdrawal delays prevent instantaneous exploits

Technical Stack

- Language: Solidity 0.8.20+
- Standard: BEP-20 / ERC-20 compatible
- Framework: Hardhat for development and testing
- Libraries: OpenZeppelin battle-tested contracts
- Testing: 95%+ code coverage with unit and integration tests
- Audit: CertiK comprehensive security review

12. LEGAL & COMPLIANCE FRAMEWORK

Token Classification: Utility Token

OVEX is designed and structured as a utility token for gaming purposes, not as an investment security. Analysis under the Howey Test framework:

- **No Investment of Money Expectation:** Token provides direct gaming utility and functionality, not investment returns or profit sharing
- **No Common Enterprise:** No profit pooling arrangements or collective revenue sharing schemes exist
- **No Expectation of Profits from Others:** Token value derives from actual usage and utility in gaming ecosystem, not from efforts of a promoter
- **Consumptive Use Case:** Primary and intended purpose is facilitating in-game transactions, deposits, withdrawals, and gameplay functionality

Compliance Measures

- **Terms of Service:** Comprehensive terms with detailed risk disclaimers and non-investment disclaimers
- **Geographic Restrictions:** Token sales prohibited in high-risk jurisdictions including United States, China, North Korea, Iran, and other OFAC-sanctioned countries
- **KYC/AML Procedures:** Know Your Customer and Anti-Money Laundering checks for all transactions exceeding \$10,000 threshold
- **Legal Structure:** Foundation entity established in Cayman Islands with operational subsidiary in Singapore for optimal regulatory positioning
- **Regular Legal Reviews:** Ongoing monitoring of evolving global regulatory landscape with quarterly compliance audits
- **Privacy Policy:** GDPR-compliant data handling and user privacy protection

Risk Disclosures

- **Technology Risks:** Smart contract vulnerabilities despite audits, blockchain network congestion, oracle failures, gas price volatility

■ ■ **Market Risks:** High price volatility common in cryptocurrency markets, liquidity constraints during market stress, correlation with broader crypto markets

■ ■ **Regulatory Risks:** Evolving cryptocurrency regulations may negatively affect operations, potential restrictions in certain jurisdictions

■ ■ **Business Risks:** Game adoption rates may be slower than projected, competition from established gaming tokens, technology platform dependencies

■ ■ **Operational Risks:** Team member departures, development delays, technical challenges in game integrations

Important Notice: This document does not constitute investment advice. Cryptocurrency investments carry significant risk including potential total loss of capital. Always conduct thorough independent research and consult qualified professionals.

13. CONCLUSION & CONTACT INFORMATION

OverX (OVEX) represents the next evolution in gaming economies by providing a unified, efficient, and player-centric token infrastructure. Built on BNB Chain with robust tokenomics, comprehensive security measures, and a clear path to adoption, OVEX is positioned to become the universal currency for Web3 gaming.

Key Differentiators

- ✓ True multi-game utility with seamless cross-platform functionality
- ✓ Deflationary economic model ensuring long-term value preservation
- ✓ BNB Chain infrastructure providing speed and cost advantages
- ✓ Community-driven DAO governance enabling decentralized decision-making
- ✓ Professional team with proven track records in gaming and blockchain
- ✓ Clear, executable roadmap with realistic milestones
